EDUCITY PEDAGOGY PRIVATE LIMITED is an information technology company providing customized software product & services and digital platforms to its clients besides being a leading online education and career coaching services organization. It has gained substantial experience in the business of serving the needs of young aspirants for their success in their professional career. The company has myriad innovative IT projects, tools and products for the success of young professionals to help them shape their career.

WHY EDUCITY SCHOOL ERP

It is important to have the right management to run any institute in a disciplined manner, and the right management needs support and correct statistics. In such a situation, it becomes very important that where and how the figures and support are met, and how soon it will be met ... there should be a centralized system for this, which keeps and updates all activities related to your prestigious institution.

For the active decisions, the process of complex system should be simplified and related to total control, system planning, implementation and review on every (small or large) issue.

Educity ERP software, which will reduce the process of every facet of the school, will be admission, transportation, examination, library, strong timetable, human resources and payroll etc.

When you proceed with automation, you have some common obstacles, such as cost, additional man hours planned to customize ERP, strange process of application etc. Fortunately, our ERP protects you against these common concerns.
